

BRIEFING

Dear participants,

Please read the following instructions carefully, so that you can finish safely and have an equal chance of distinction.

- The administrative control & scrutineering and the delivery of material will be carried out based on the posted program on the official website of the club www.sisa.gr
- A GPS Timing Sensor (Transponder) with an autonomous battery & Live Tracking will be installed by the Organization in your vehicles. Deliberate interference with the operation of the Transponder of the timing system is prohibited under penalty of exclusion.
- If for any reason it is not possible to extract the time from the transponder of a crew, then the stewards will decide the fairest way in which time will be attributed to this crew. This decision will be final and cannot be appealed!
- Do not forget that you are participating in a regularity event on public open roads! Respect the Road Rules, other drivers & pedestrians and of course the other participants.
- The requested Average Hourly Speeds on provincial roads do not exceed 50 km/h, those passing through residential areas are from 20 to 50 km/h. On sections of national roads the Average Speed can reach up to 80 km/h.
- There will be speed controls when passing through residential areas.
1st violation: warning, 2nd violation: warning, 3rd and each subsequent violation: 20PP. Excessive exceeding of the speed limit: Immediate Disqualification
- This rally passes through a typical mountain network and always be alert for damage to the road surface and stones from landslides. Do not forget that on provincial roads and Special Stages you may encounter domestic or wild animals and the risk of collision is high.
- The Road Book has been written with great precision, however, there may be small deviations in distances, which do not affect the correctness of the route or the ideal times of the Special Stages.
- Read the Special Stages announcements carefully because they may differ from each other in the way they are executed. All ideal times are achievable!
- It is prohibited to completely stop the vehicle at least 50 meters before the time control points (check points) of the Special Stages. The vehicle must move at a constant speed while passing through them, otherwise you may be given an early recording time for the passage.
- The Organizing Committee reserves the right without warning & explanation to merge special stages or parts thereof and to sum the ideal times, as well as to cancel or not count parts of them.
- At the start the Classique category will start first, then the Regularity category and then the Youngtimer-GT category.
- In case before or within a Special Stage or before Time Control Stations you are not sure what to do or in case a vehicle of a participant following you persistently tries to pass you, then a) let this vehicle pass you, b) do not block the starting line and c) do not block the crossing or finishing point. Otherwise, obstructing another participant may be considered unsportsmanlike behavior and may even result in disqualification!
- Any overtaking within the special stages is prohibited, unless the vehicle in front joins. Especially the crews of the Classique category, which have fewer time measurements, should not unnecessarily overtake a vehicle in front of them in the Regularity category. Also, "spins" at the beginning of the Special Stages are prohibited because they may cause damage to the vehicles following.
- Any intentional deviation from the route of the Route Book and not due to force majeure, as determined by the Stewards, is prohibited under penalty of disqualification. We remind you that your vehicle carries a GPS transmitter and your route is monitored throughout the rally. The Classique category is excluded for the sections where there are relevant instructions.
- During regroupings & restarts, keep your turn, respect other participants, do not obstruct other drivers, do not close the roads and do not consume alcoholic beverages during the competition part!
- This rally is judged on endurance, tactics & precision. To stand out you must finish! Never risk an accident that will endanger your physical integrity & damage to your car.
- In case of emergency during the race, contact only the Secretariat at 6983696860.
- During the rally you will receive push notifications at **SPORTITY APP** (please download)

Event Name: **24 Hours Greece 2025** Endurance Regularity Rally – PSWD **24HGR2025**

The organizing committee wishes you good fun, good luck & a safe finish.
